This Is The Time To Buy
This is a fantastic time for real estate wholesalers to be buying and lining up deals.
Fall is the best season for writing offers on property. There may still be the tail end of the back to school season to capitalize on. After which sellers panic during the following seasonal lull in competition.
Other recent trends in mortgage rates, and home loan defaults are compounding this, so that real estate investors can take advantage of more negotiability, and even better discounts on new properties.
Line Up Those Windfall Profits
Some housing markets are still experiencing up to 40% year over year appreciation. Both hyperaffordable markets where people are moving to, as well as wealthy enclaves used for asset protection.

Others will see their uptick closer to the end of the year. Annual bonuses, a surge in economic and real estate activity from Black Friday through New Years Eve all help to make this one of the great time to sell.
